

# INTEL INSIDE

## AMAZING WINDOWS 10 OUTSIDE

The synchronized release of Windows<sup>®</sup> 10 Enterprise and 6th gen Intel<sup>®</sup> Core™ vPro™ processors offers a huge opportunity for a better together upgrade.

## There's Never Been a Better Refresh Opportunity

Today, more than 52 million enterprise systems are four years old or more.<sup>1</sup> That means millions of business end users are losing productivity on aging devices that might be presenting security risks and IT management headaches.

The good news: At this amazing juncture in technology history, Microsoft is releasing its newest operating system, Windows® 10 Enterprise, at the same time that Intel introduces 6th generation Intel® Core™ vPro™ processors, spelling huge opportunity for providers and businesses.

## Meeting the Needs of the Modern Enterprise

By itself, an upgrade to Windows® 10 makes perfect sense, as it offers robust new features in a familiar working environment. But, that value grows exponentially when paired with a hardware refresh featuring powerful and secure 6th gen Intel® Core™ vPro™ processors.

## Built for Productivity

This latest generation of processors delivers 2.5x the productivity in an expanded range of energy-efficient form factors so you can find the best device for every job.<sup>2</sup> Choose from an expandable desktop tower, a touchscreen All-in-One for customer-facing locations, or a compact-but-powerful mini PC for small workspaces. The latest mobile form factors provide long battery life and are available in razor-thin 2 in 1s, sleek Ultrabook™ devices, and quad-core-based laptops for top of the line performance.

### Optimized for Intel® Architecture

Intel and Microsoft teams have worked together to optimize Windows® 10 on Intel® architecture to deliver improved fundamentals, like multitasking, Snap Assist, Cortana\* personal assistant software, and virtual desktops, as well as to introduce new, innovative applications, all in an effort to enable efficient productivity for business end users.

**UP TO 2.5 X THE PRODUCTIVITY<sup>2</sup>**

**Up to 2.5x faster performance<sup>2</sup>**

Enable businesses to do more

## Power Plus Protection

The wide array of workplace devices and mobility needs paired with modern security threats demand safeguards and manageability. Intel® platforms with Windows® 10 Enterprise deliver to meet these demands.

### Security for the Modern Enterprise

Microsoft's amazingly secure OS is made even stronger with hardware-level security features built into 6th gen Intel® Core™ vPro™ processors. These technologies work together to protect corporate data, devices, and identities—even with biometric access.

### Streamline Management

Windows® 10 Enterprise performs as one core application across every device for easy cross-platform support that's made easier still with Intel® Active Management Technology and Intel® vPro™ technology.

Protection for  
**Data + Devices + Identities**

**Help your customers sharpen their competitive advantage with increased productivity, security, and manageability with a better together upgrade featuring Windows® 10 Enterprise and 6th gen Intel® Core™ vPro™ processors. It's simply a better way to work.**

Deliver a better together refresh with 6th gen Intel® Core™ vPro™ processor-based systems running Windows® 10.

Software and workloads used in performance tests may have been optimized for performance only on Intel® microprocessors. Performance tests such as SYSmark\* and MobileMark\* are measured using specific computer systems, components, software, operations, and functions. Any change to any of those factors may cause the results to vary. You should consult other information and performance tests to assist you in fully evaluating your contemplated purchases, including the performance of that product when combined with other products. For more complete information, visit [intel.com/performance](http://intel.com/performance).

Configurations: Intel® Reference Platform is an example new system. Products available from systems manufacturers will not be identical in design, and performance will vary. Intel® Reference Platform with Intel® Core™ i5-6200U processor, PL1=15W TDP, 2C4T, turbo up to 3.4GHz/3.2GHz. Memory: 2x4GB DDR4-2133. Storage: Intel® Solid State Drive (Intel® SSD). Display: 1920x1080 resolution. Graphics Driver: 15.40.4225. Battery: 43Whr. OS: Windows® 10. Five-year-old PC with Intel® Core™ i5-520UM processor (1.06GHz up to 1.86GHz, 2C4T, 3MB) on Acer Aspire\* 1830T. Memory: 4GB DDR3 1600MHz. Storage: 500GB hard drive. Display: 11-inch 1366x768 resolution. Battery: 63Whr. OS: Windows\* 7.

Intel® technologies may require enabled hardware, specific software, or services activation. Performance varies depending on system configuration. No computer system can be absolutely secure. Check with your system manufacturer or retailer or learn more at [www.intel.com](http://www.intel.com).
