

Great reasons to upgrade to Windows 10

Move business forward with Windows 10 and a range of new Intel-powered devices that display and dock wirelessly, all while helping keep you secure.

Do more, be
more productive

Do more with improved multi-tasking, faster access to devices, less waiting and a familiar work environment.

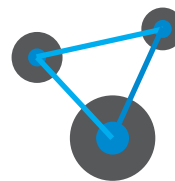

Stay current,
with less effort

Manage and secure Windows, iOS* and Android* devices from a single management console, more effectively provision and deploy applications.

Provision and
deploy **more
efficiently**

Utilize one store for all apps, with the customizable Windows Store portal. Write each app once for all Windows 10 devices.

Managed for
**continuous
innovation**

Seamlessly integrate upgrades with existing applications, network ecosystems and management platforms.

Helps protect
**data, devices,
and identities**

Work from a secure PC platform strengthened by close integration of advanced hardware and software capabilities.
