

INTEL INSIDE

AMAZING WINDOWS 10 OUTSIDE

The synchronized release of Windows® 10 Enterprise and 6th gen Intel® Core™ vPro™ processors offers a huge opportunity for a “better together” upgrade.

2.5X PRODUCTIVITY

Enable Businesses to Do More

Optimized for 6th gen Intel® Core™ vPro™ processors, Windows® 10 Enterprise offers improved fundamentals, like multitasking, alongside new capabilities, like in-browser note-taking and the natural-language Cortana* digital assistant. Plus, enhance the experience with transformative technologies, like Intel® Pro WiDi and Intel® Wireless Docking.

DATA + DEVICES + IDENTITIES

Enterprise-Grade Security

Microsoft's amazingly secure OS is made even stronger with hardware-level security features built into 6th gen Intel® Core™ vPro™ processors. These technologies work together to protect corporate data, devices, and identities—even with no-password biometric access.

1 APP, ANY PLATFORM

Streamline Cross-Platform Management

Windows® 10 offers a single application on every device so IT can manage and secure devices from a single console. Meanwhile, Intel® vPro™ technology and Intel® Active Management Technology enable seamless remote support and repairs.

Deliver a better together refresh with 6th gen Intel® Core™ vPro™ processor-based systems running Windows® 10.

what's inside™

Software and workloads used in performance tests may have been optimized for performance only on Intel® microprocessors. Performance tests such as SYSmark* and MobileMark* are measured using specific computer systems, components, software, operations, and functions. Any change to any of those factors may cause the results to vary. You should consult other information and performance tests to assist you in fully evaluating your contemplated purchases, including the performance of that product when combined with other products. For more complete information, visit intel.com/performance.

Configurations: Intel® Reference Platform is an example new system. Products available from systems manufacturers will not be identical in design, and performance will vary. Intel® Reference Platform with Intel® Core™ i5-6200U processor, PL1=15W TDP, 2C4T, turbo up to 3.4GHz/3.2GHz. Memory: 2x4GB DDR4-2133. Storage: Intel® Solid State Drive (Intel® SSD). Display: 1920x1080 resolution. Graphics Driver: 15.40.4225. Battery: 43Whr. OS: Windows® 10. Five-year-old PC with Intel® Core™ i5-520UM processor (1.06GHz up to 1.86GHz, 2C4T, 3MB) on Acer Aspire* 1830T. Memory: 4GB DDR3 1600MHz. Storage: 500GB hard drive. Display: 11-inch 1366x768 resolution. Battery: 63Whr. OS: Windows* 7.

Intel® technologies may require enabled hardware, specific software, or services activation. Performance varies depending on system configuration. No computer system can be absolutely secure. Check with your system manufacturer or retailer or learn more at www.intel.com.

1. Measured by SYSmark* 2014, a benchmark from BAPCo* consortium, which measures the performance of commonly used productivity applications, such as Microsoft Excel* and Adobe Acrobat*. Find out more at www.bapco.com.
